PROFESSIONAL SUMMARY

Total **3+ years** of professional and training experience in Java Full Stack Development, including **2.5 years** of industry experience and **9 months** of certified training.

- **Backend Development:** Improved and maintained Java-based backend modules using Core Java and OOP principles.
- **Frontend Development:** Skilled in React.js for building responsive user interfaces.
- **API Development:** Implemented REST API endpoints using Spring Boot to support CRUD operations.
- **Microservices:** Knowledge of microservices architecture for scalable applications.
- **Version Control:** Experienced with Postman for API testing and Git for version control during development.
- **Database Management:** Utilized JDBC with MySQL to ensure reliable database interactions.
- **Debugging & Optimization:** Strong skills in code debugging and performance optimization.
- **Development Practices:** Experience with CI/CD pipelines and Agile methodology.
- **Quality & Delivery:** Skilled in delivering high-quality, maintainable, and efficient code.

TECHNICAL SKILLS

Backend: Java SE, Advanced Java, Spring Boot, Spring MVC, Spring Framework, Hibernate, JSP, JDBC, Servlet.

APIs: RESTful APIs, Web Services, JSON, XML.

Frontend: React.js, JavaScript, HTML, CSS, JSX.

Databases: MySQL, SQL Server, Oracle Database.

IDE Tools: STS, Eclipse, NetBeans, VS Code, SQL Developer.

Concepts: OOP, MVC, DI, JWT, SDLC, Agile, DSA, CI/CD, System Design.

Tools: Git, Git Bash, Docker, Swagger UI, Postman, Tomcat, Maven, SonarQube.

AI Basics: Fundamentals of Prompt Engineering, Integration of AI APIs in Java applications, and understanding of LLM workflows.

AI Productivity: Proficient in using AI coding assistants (GitHub Copilot, ChatGPT) to accelerate unit testing and boilerplate code generation.

Cloud & DevOps: Basics of AWS (EC2, S3), Container Orchestration using Docker, and automated deployment monitoring.

PROFESSIONAL EXPERIENCE

Java Developer | Aptara Technologies Pvt. Ltd, Noida

April 2022 – November 2024

1. Power Manage (POM)

"A real-time service designed to process manuscripts and files to generate outputs, calculate pricing, track publication, and ensure timely delivery through secure handling."

- Designed Controller and Command Bean classes which get the information from respective user requests, and return the data to the user.
- Created Business Layer and DAO integration.
- Developed REST endpoints for document processing and metadata extraction.
- Implemented automated unit testing for core application modules.
- Managed deployments, server monitoring, logs, error tracing, and Tomcat server administration.
- Handled backend logic, workflow stages, and processing pipelines.

2. Power QA (PQA)

"A real-time validation service that ensures article correctness, formatting, and authenticity, generating XML, PDF, and HTML outputs prior to publishing."

- Managed validation engines for XML formatting, content rules, and media validation.
- Designed Controller, Service, and Command Bean classes with dynamic rule evaluation.
- Optimized validation logic and database queries.
- Resolved critical production bugs.
- Oversaw enterprise-level production server environments to ensure high availability.
- Managed deployments, server monitoring, logs, error tracing, Tomcat.

Java Full Stack Developer | Q-Spiders Institute, Noida

December 2024 – October 2025

- Completed certified 9-month Java Full Stack training program covering Spring Boot, React.js, Microservices, Docker, and REST API development.

PROJECTS

Course Hub

Chrome :- <https://anubhawsinha-git.github.io/Course-Hub/>

- A web-based platform to organize and showcase curated learning resources and courses for developers.

EDUCATION

B.Tech in Mechanical Engineering | Tula's Institute, Dehradun (2018–2022)

CGPA: 6.50
