PROFESSIONAL SUMMARY

3+ years of professional and training experience in Java Full Stack Development, including 2.5 years of industry experience, 9 months of certified training, and current backend engineering work at PATH India.

- **Backend Development:** Improved and maintained Java/Node.js backend modules using Core Java, OOP principles, and Express.
- **Frontend Development:** Skilled in React.js and Next.js for building responsive, server-rendered user interfaces (SSR/SSG).
- **API Development:** Implemented REST API endpoints using Spring Boot and Node.js to support CRUD operations.
- **Security:** Experience with SSL/TLS, X.509 certificate validation, JWT, and OAuth2-based authentication.
- **Database Management:** Utilized JDBC with MySQL and Prisma ORM for reliable database interactions.
- **Development Practices:** Experience with CI/CD pipelines, Agile methodology, and delivering high-quality, maintainable code.

TECHNICAL SKILLS

- **Backend:** Java SE, Advanced Java, Spring Boot, Spring MVC, Spring Framework, Hibernate, JSP, Servlets, Node.js, Express.js
- **APIs & Communication:** RESTful APIs, Web Services, JSON, XML, XML Parsing & Validation, Axios, WebSockets, STOMP
- **Messaging & Event-Driven Architecture:** RabbitMQ, AMQP, Exchanges, Queues, Routing Keys, Asynchronous Messaging, Message Retry, Dead Letter Queue (DLQ), Dead Letter Exchange (DLX), Event-Driven Architecture
- **Frontend:** React.js, Next.js (SSR/SSG), JavaScript, HTML, CSS, JSX
- **Security:** SSL/TLS, OpenSSL, X.509, PKCS#12 (.p12) Certificates, JWT, OAuth 2.0, Asymmetric Cryptography
- **Databases & ORM:** MySQL, SQL Server, Oracle Database, SQL, Database Design, Joins, Indexing, Transactions, Prisma ORM
- **Programming & Software Concepts:** OOP, MVC, Dependency Injection (DI), DSA, SDLC, Agile, System Design, Exception Handling, Error Handling, Fault Tolerance, Microservices
- **Tools & Development:** Git, Git Bash, Docker, Swagger UI, Postman, Tomcat, Maven, SonarQube, STS, Eclipse, NetBeans, VS Code, SQL Developer
- **AI:** Prompt Engineering Fundamentals, AI API Integration in Java Applications, LLM Workflows, AI-Assisted Development, GitHub Copilot, ChatGPT
- **Cloud & DevOps:** AWS (EC2, S3) Fundamentals, Docker Containerization, CI/CD, Deployment Monitoring

PROFESSIONAL EXPERIENCE

Software Engineer | PATH India Ltd, Mhow June 2026 – Present

SSL Certificate Verification – Next.js

- Used HTTPS/TLS for encrypted communication between client and server.
- Applied OpenSSL (via Node.js) for cryptographic operations and certificate validation.
- Verified server certificates against trusted CA (Certificate Authority) certificates.

User Authentication API – Node.js

- Built secure authentication using JWT tokens, asymmetric algorithms, and OAuth2.

XML Parsing – Node.js

- Read and parsed XML files to exchange data between systems.
- Integrated XML-based data exchange with banking and government systems.

XML Request-Response API – Node.js

- Built request-response flows using Axios with XML parsing and validation.

Software Engineer | Aptara Technologies Pvt. Ltd, Noida April 2022 – Nov 2024

Power Manage (POM) – Real-time manuscript processing service

- Designed Controller, Command Bean, and Business Layer/DAO classes; developed REST endpoints for document processing and metadata extraction.
- Implemented automated unit testing; handled backend workflow stages and processing pipelines.
- Managed deployments, server monitoring, logs, error tracing, and Tomcat server administration.

Power QA (PQA) – Real-time article validation service

- Managed validation engines for XML formatting, content rules, and media validation; designed Controller/Service/Command Bean classes with dynamic rule evaluation.
- Optimized validation logic and database queries; resolved critical production bugs; oversaw enterprise-level production servers for high availability.

CERTIFICATIONS & COURSES

- **Java Full Stack Developer** | Q-Spiders — Dec 2024 – Oct 2025 — Completed certified full-stack training covering Core Java, Spring Boot, React.js, Node.js and database fundamentals.
- Agentic AI – Udemy (in progress)

EDUCATION

B.Tech in Mechanical Engineering | Tula's Institute, Dehradun (2018–2022), CGPA: 6.50
